Election/Restrictions

1. Applicant's election without traverse of Species I, subspecies A in Paper No. 10 is acknowledged.

2. Claims 7, 16, 21-23, and 25-36 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species and/or subspecies, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 10.

Claim Rejections - 35 USC § 112

3. Claims 5, 6,13-15, and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 5, 13, and 14 the phrase "said throat" lacks antecedent basis rendering the claim vague and indefinite.

In claim 24 the phrase "wraps around said portion of said human" is vague and indefinite because it defines the article in reference to a human which is undefined.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent

granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 20, 24, and 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Cherubini (5015251).

Cherubini shows an article of clothing with an opening (shown in figure 4) in which a human portion (32) is placed and it being formed from a material with hooks (21) on one side and pile (20) on the other.

6. Claims 1-3, 5, 6, 11, 12, 14, 15, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Petker (4751784).

Petker shows footwear comprising a sole (12), an upper (14 and 15) with a portion which has one side of hooks (17) and the other side of pile (entire footwear is made from pile material), and a strap (14) as claimed.

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 1-5, 8, 11-14, 17, 20, and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Williams (4969277) in view of Petker (4751784).

Williams shows footwear comprising a sole (15), an upper (17 and 19), a portion with a plurality of hooks (63/71), two straps (55 and 59), and one strap being a heel strap

(59) substantially as claimed except for the portion which has the plurality of hooks thereon having a pile surface on the other side. Petker teaches forming footwear from pile material and providing a plurality of hooks (17) on a portion thereof thereby resulting in a portion of the footwear having hooks on one side and pile on the other. It would have been obvious to form the footwear from pile material as taught by Petker in the footwear of Williams to reduce the cost of manufacture, provide a disposable footwear, provide a comfortable footwear.

9. Claims 10 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claims 1 and 11 above, and further in view of Kennedy (5744080).

Either Williams as modified above or Petker as described above shows footwear substantially as claimed except for the hooks being providing as a single ply with the pile. Kennedy teaches forming hooks and pile as a single ply (see figures 7 and 8). It would have been obvious to form the hooks as a single ply with the pile as taught by Kennedy in the footwear of either Williams as modified above or Petker as described above to provide a secure attachment of the hooks to the pile material.

10. Claims 9 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claims 1-5, 8, 11-14, 17, 20, and 24 above, and further in view of Kuehnreich (5176624).

Williams as modified above shows footwear substantially as claimed except for the heel portion being formed of two overlapping straps. Kuehnreich teaches forming a heel area as two overlapping straps (10 and 11). It would have been obvious to form

Art Unit: 3728

the heel as two overlapping straps as taught by Kuehnreich in the footwear of Williams as modified above to increase the adjustability of the footwear in the heel area.

11. Claims 1-5, 11-14, 20, and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Friton (4486965) in view of Petker (4751784).

Friton shows footwear comprising a sole (12), an upper (14), a portion with a plurality of hooks (38), and two straps (24 and 30) substantially as claimed except for the portion which has the plurality of hooks thereon having a pile surface on the other side. Petker teaches forming footwear from pile material and providing a plurality of hooks (17) on a portion thereof thereby resulting in a portion of the footwear having hooks on one side and pile on the other. It would have been obvious to form the footwear from pile material as taught by Petker in the footwear of Friton to reduce the cost of manufacture, provide a disposable footwear, provide a comfortable footwear.

12. Claims 1-3, 5, 6, 11, 12, 14, 15, 20, and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Famolare, Jr. (4114297) in view of Petker (4751784).

Famolare, Jr. shows footwear comprising a sole (12), an upper (11), a portion with a plurality of "Velcro" fasteners(20) which extends from the throat of the footwear to the sole, and a strap (26) substantially as claimed except for the portion having "Velcro" fasteners thereon having hooks and pile. Petker teaches forming footwear from pile material and providing a plurality of hooks (17) as the Velcro fasteners on a portion of the upper thereby resulting in a portion of the footwear having hooks on one side and pile on the other. It would have been obvious to form the footwear from pile material as

taught by Petker in the footwear of Famolare, Jr to reduce the cost of manufacture, provide a disposable footwear, provide a comfortable footwear.
